

iShares MSCI Spain Index Fund

Fund Description

The iShares MSCI Spain Index Fund seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of publicly traded securities in the Spanish market, as measured by the MSCI Spain Index ("the Index").

Index Description

The Index seeks to measure the performance of the Spanish equity market. It is a capitalization-weighted index that aims to capture 85% of the (publicly available) total market capitalization. Component companies are adjusted for available float and must meet objective criteria for inclusion to the Index, taking into consideration unavailable strategic shareholdings and limitations to foreign ownership. MSCI reviews their indexes quarterly.

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling toll-free 1-800-iShares (1-800-474-2737) or by visiting www.iShares.com.

After Tax Held Returns represent return after taxes on distributions. Assumes shares have not been sold. After Tax Sold Returns represent the return after taxes on distributions and the sale of fund shares. Returns are average annualized total returns, except those for periods of less than one year, which are cumulative. Market returns are based upon the midpoint of the bid/ask spread at 4:00 p.m. eastern time (when NAV is normally determined for most iShares Funds), and do not represent the returns you would receive if you traded shares at other times.

Index performance returns do not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and one cannot invest directly in an index. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown. The after-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.
