

SILICON VALLEY 150 RANKINGS OF THE

How the rankings are determined

The Silicon Valley 150 ranks public technology companies headquartered in Alameda, Contra Costa, San Francisco, San Mateo and Santa Clara counties on the basis of worldwide revenue ("sales") for the most recent available four quarters. Most results are for the four quarters ended on or near Dec. 31, 2013.

The one-year percentage change in sales is measured from comparable results most recently reported by companies for the same periods the year before. Ranks for 2012 were based on revenue reported at the time for those periods.

Profit rankings are based on net income and include results from discontinued operations, restructuring and merger-related expenses, investment gains or losses, gains on extinguishment of debt, as well as any amortized or non-recurring charges.

Profit margin is calculated by dividing the company's net income for the most recent four quarters by its sales for the same period.

Market capitalization — the number of shares outstanding multiplied by the price of a single share — is as of March 31, the last trading day of the first quarter of 2014.

Dollar figures are in millions.

Key

 Double-digit advances in rank

 Double-digit declines in rank

 New to list after an initial public offering in 2013

¹ Pandora Media changed fiscal year during 2013; results are for 11 months ended Dec. 31

² Year-before period results not available as of March 31, 2014
